

**Note: This is not the same product as Microban® Sanitizing Detergent.**

Microban® is a broad spectrum disinfectant proven effective against most bacteria, fungus and mildew odors caused by bacteria and germs. It truly is the best of both worlds – potent disinfecting properties with safe active ingredients.

This high profile, EPA-registered anti-microbial kills just about everything in its path: allergy- and disease-causing germs bacteria, fungi, mold and mildew.

Microban® Disinfectant Spray is a true “professional strength” antimicrobial, nearly 10 times stronger than so-called “competitive” products, yet it is also a remarkably safe product. Its active ingredients are used pharmaceutically, medically and used for the post-harvest treatment of fruits and vegetables to protect against microbial damage during storage and distribution. You’ll even find these same ingredients in common antibacterial wipes.

Microban® doesn’t require the use of gloves, a respirator or safety goggles for spraying applications. You don’t even have to wipe or rinse it off most surfaces. It can even be fogged into air ducts to help prevent the spread of airborne bacteria and odors.

Microban® Disinfectant Spray truly is the best of both worlds – potent disinfecting properties with safe active ingredients. Microban® is suitable for hospital and healthcare institutions, animal care facilities and any other type of environment that requires absolute cleanliness. It’s an excellent choice when faced with jobs that include decontaminating textiles, mattresses, bedding and other cloth-related items. Microban® Disinfectant Spray works equally well on both hard and soft surfaces.

<b>Effective against:</b>	
<b>Fungi:</b>	<b>Viruses:</b>
