

Urine Decontamination Treatment

The Questions- Have you:

1. Wasted money on tons of deodorizing and neutralizing products that don't work?
2. Lit several candles in an attempt to mask pet urine odor?
3. Considered disposing of your favorite rug?

Trust us you're not alone! We've always said that pets are our best customers and it's not because they're cute and cuddly!

The Answer- Urine Decontamination Treatment: [Guaranteed]

1. Your rug is totally submersed in a proprietary bath of specialty solutions for 12-24 hours.
2. This exclusive mix of specially designed solutions liquefy old urine deposits and flushes them from the rug fibers.
3. During this bath the bacteria that cause the offending odor are destroyed.
4. Following the bath your rug is ready to be sent through our thorough washing process as outlined [here](#).
5. When completed your rug is clean, fresh, soft and sanitary and does not smell like cover-up perfumes or deodorants **guaranteed!**

If you can relate to the questions above, then this is your best option. This is a specialty service and will require more of an investment than an average cleaning. We GUARANTEE that it works! If you are not completely satisfied that the offending odor has been removed we will refund the cost of the Urine Decontamination Treatment. Staining caused by the urine deposits may be permanent. The rug dyes are often damaged and cannot be restored.
